Projects

Caffiends | <https://github.com/kaguilera23/caffiends> | <https://caffiends.herokuapp.com/>

- *This is a website created by a collaborative group of four designed for a coffee shop*
- *The application exhibits user authentication and the basic setup for checkout using Stripe. Users are able to log in to their account and build up rewards points based on items they order.*
- *Currently working on features such as discounts with referral codes and reaching a set amount of rewards points, editing user information, and deleting user accounts.*
- *Tools/Languages: Mongoose, MongoDB, React, Express, NodeJS, GraphQL, JavaScript*

My Medi | <https://github.com/kaguilera23/my-medi>

- *This is a medication/medical information tracking application created by a collaborative group of four*
- *The application is minimalistic in styling with large, easy-to-read buttons tailored to be used by elders or those with limited access and/or experience with technology. My Medi helps to track the most important information about your health e.g. what medications you're on, the dosage, and the purpose as well as your allergies, blood type, major surgeries, etc.*
- *Tools/Languages: JavaScript, Handlebars, Express, MySQL, Sequelize*

Work Experience

Georgia Retina

March 2020 - December 2022

Tucker, Georgia

Ophthalmic Technician

- *Obtained a Certified Ophthalmic Assistant Certificate*
- *Provided positive patient experience while assessing of visual acuity, performing diagnostics, and preparing surgical paperwork*
- *Managed the flow of large patient loads in-clinic while assisting in in-office medical treatments and procedures*

Scribe America

August 2018 - February 2020
